Thank Basis architectural bureau for authorizing the publication of the project on moool,
Text description provided by Basis architectural bureau.

Basis architectural bureau: 这是为高级知识分子创造的一个舒适而鼓舞人心的办公环境。几乎所有最好的创新公司都在争夺最优秀的人才和专业人士，这导致了办公室和总部的重组。合理组织的公共空间让员工有机会在一个健康的环境中工作，也成为租户选择的重要理由。开放性、认同感和舒适性是现代公共空间的新要求。

Basis architectural bureau: We created a comfort and inspiring environment for the hi-end intellectual office workers. All the best innovative companies are competing for the best minds and professionals, what has led to a reorganization of offices and headquarters. Properly organized public spaces give employees the opportunity to work in a healthy environment, becoming a weighty argument for tenants. Openness, identity and comfort are the new requirements for a modern type of public spaces.

小区域，设置有咖啡馆和休闲区、舒适的户外工作场所和健身区。该区域设有动静不同分区，每个人都可以找到一个合适自己的舒适环境。设计中呈现的现代艺术形式和水景等自然景观将有助于激发创作者的灵感，开拓新的思路。

For this office complex, we used ground level and the roof of a stylobate to create two types of environment: an open public square and infrastructure for residents only. In a small area of the city center, we placed cafes and recreation areas, comfortable outdoor workplaces and workout zones. The territory is divided to the zones with different noise levels and each person can find a comfortable environment for himself. Modern art forms and natural landscape with water elements will inspire creators to search for new solutions.

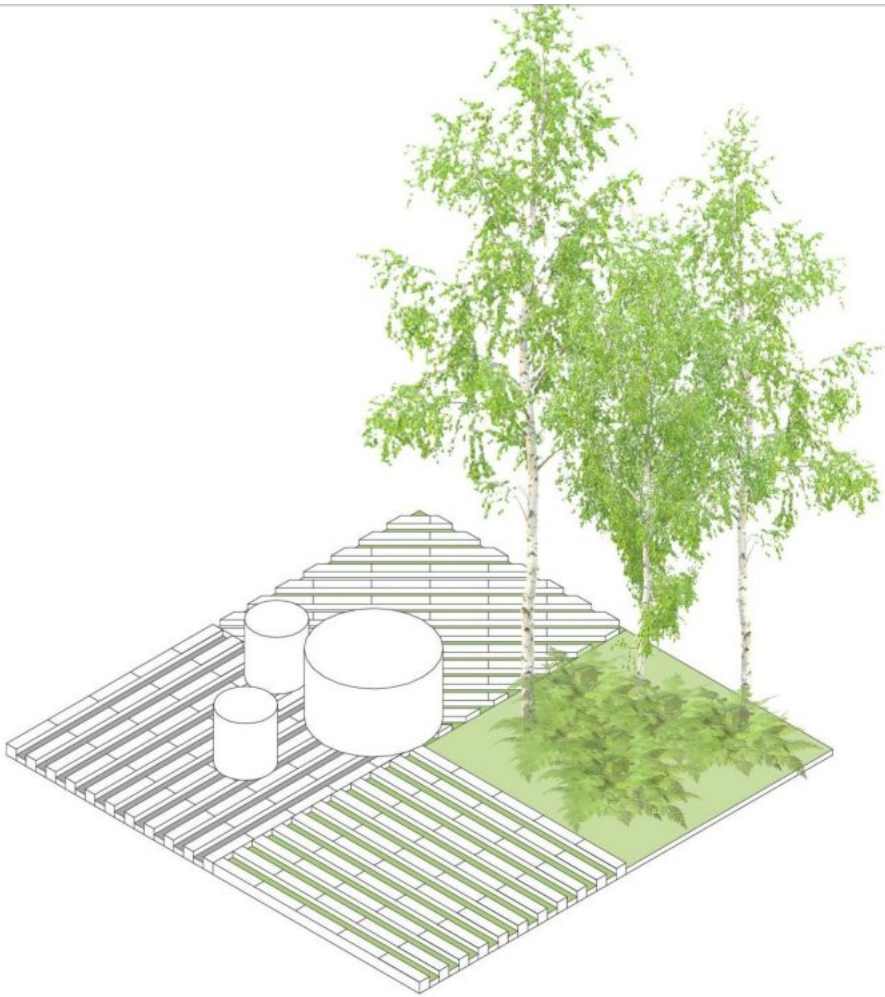

铺装，其中布满了绿色的岛屿。

The visual idea of the project is built around (fluctuation | from lat. fluctuatio | – an irregular rising and falling in number or amount, displacement or change of a given structure). This can be seen on the paving grid with breaking islands of greenery.

▽生态铺装节点 E co-paving nodes

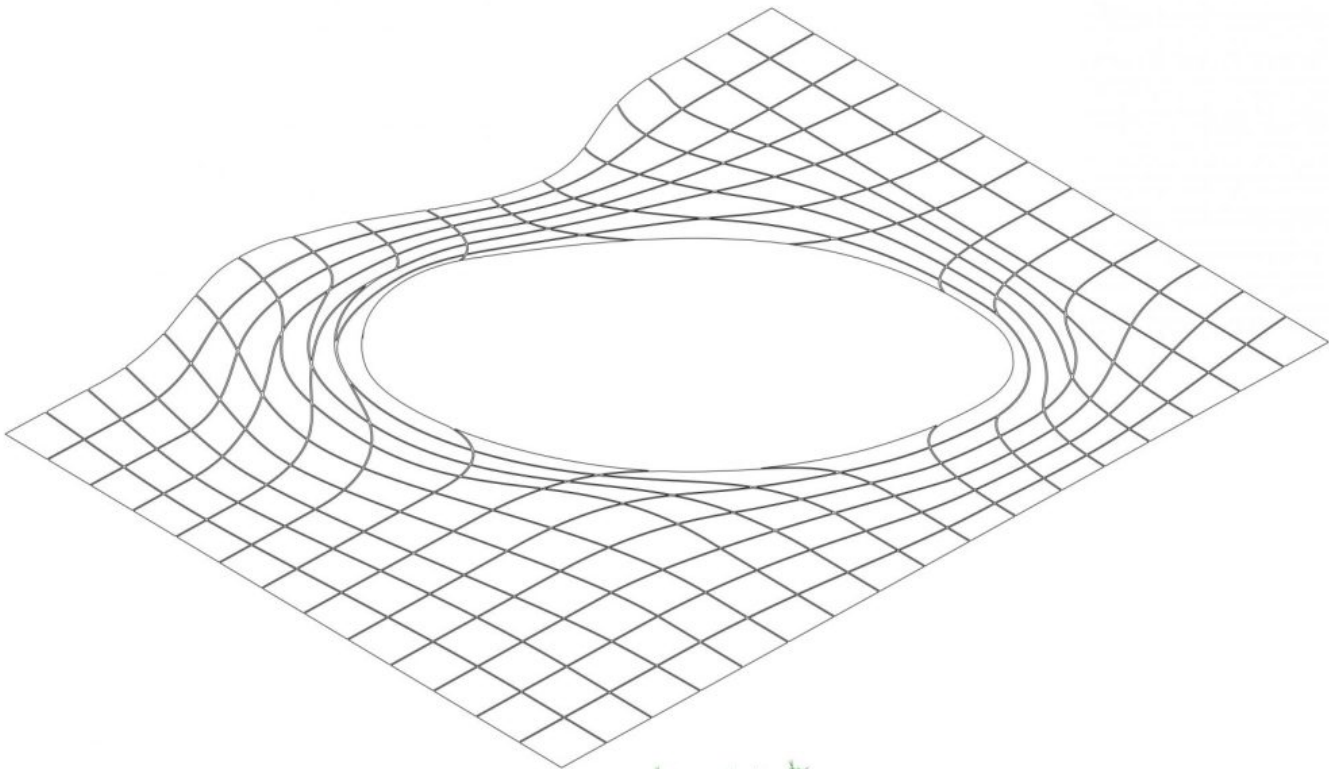

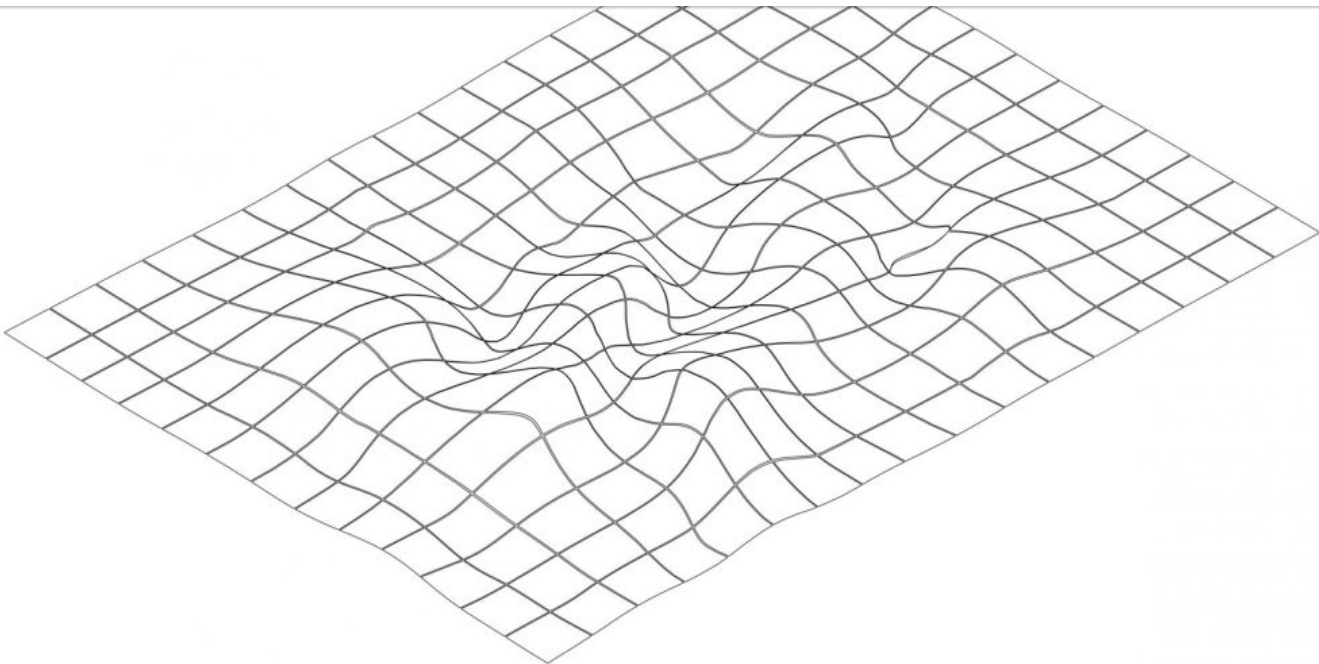

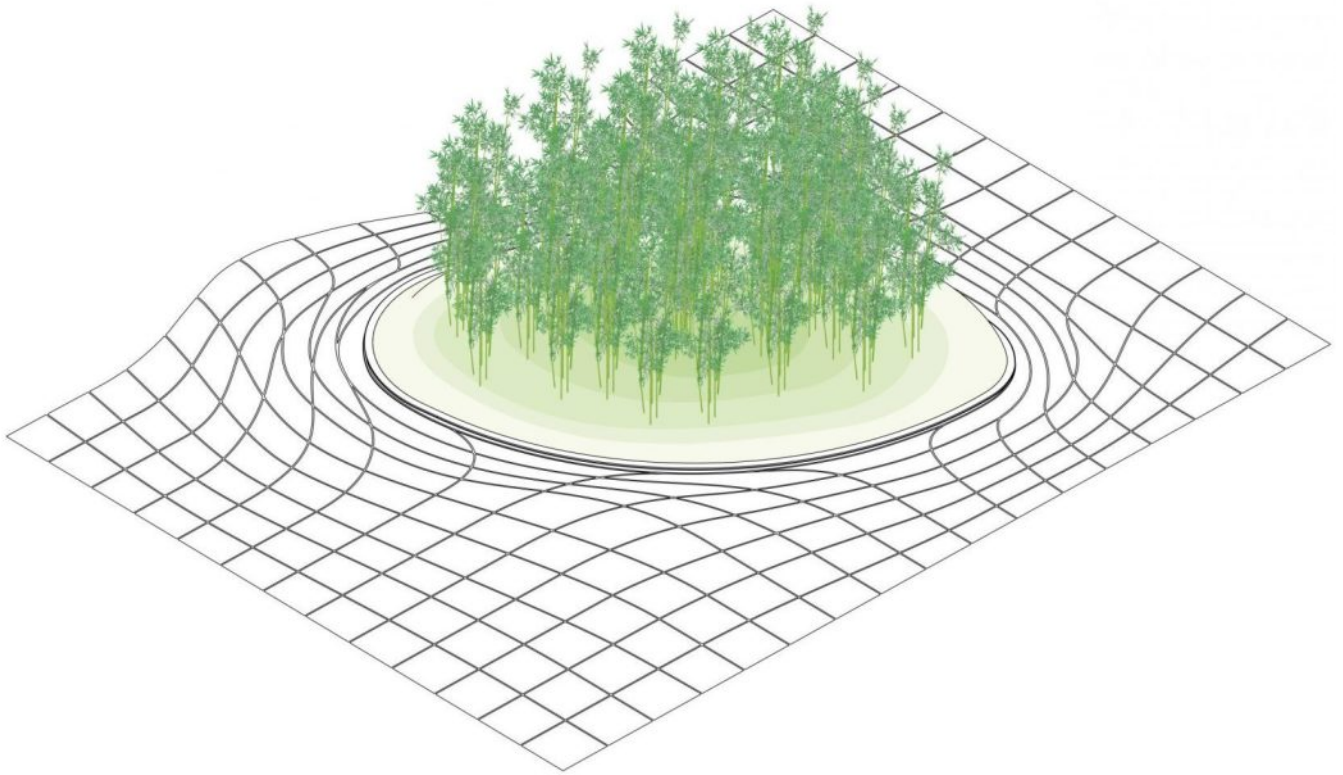

网格是数字化和办公环境的一个视觉表现，它是任何有序结构的一种表达方式。在现代社会中，公司正试图用舒适的环境来吸引有价值的员工，舒适的标准重要性变得不亚于办公的效率。

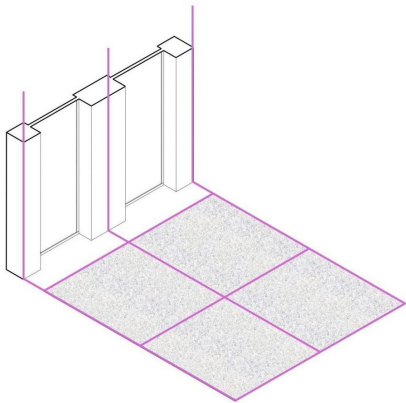

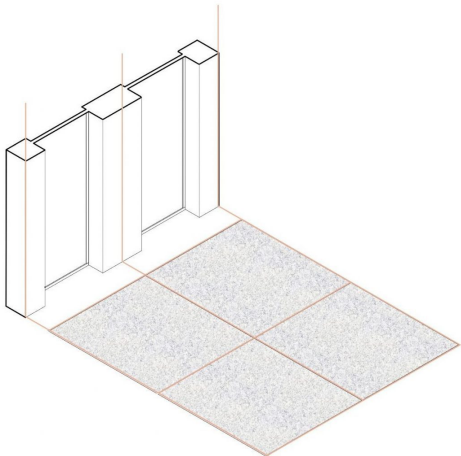

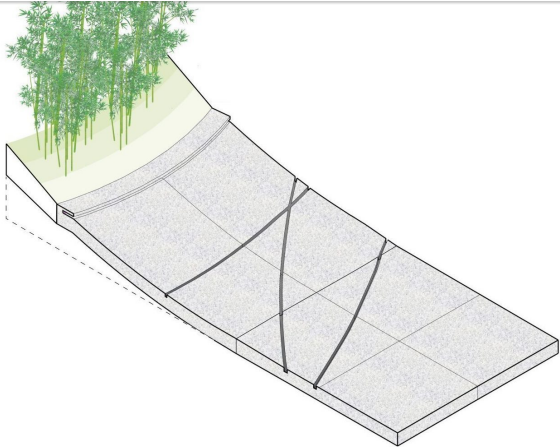

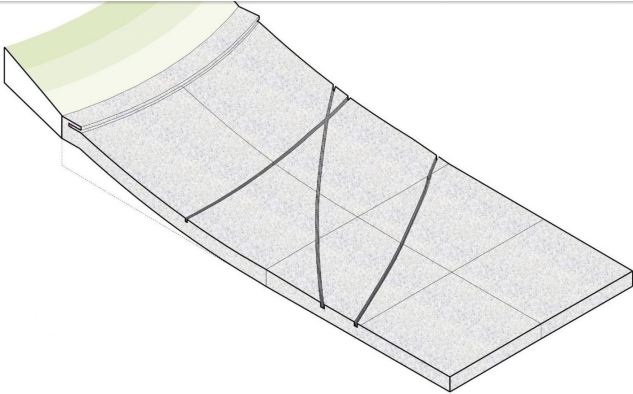

About a fluctuatia-concept: The structure of an office is built on a regular, orderly system. It represents a network of wires and a matrix of digital space. The rectangular grid is a visual representation of the digital and office environment. It's an expression of any ordered structure. In the modern world, companies are trying to attract valuable employees with comfortable environment. The criterion of comfort becomes no less important than the efficiency of the office. As part of the concept for the business center, the fluctuation method was used.

其撕裂，从而为办公人员创造一个健康的生态系统。

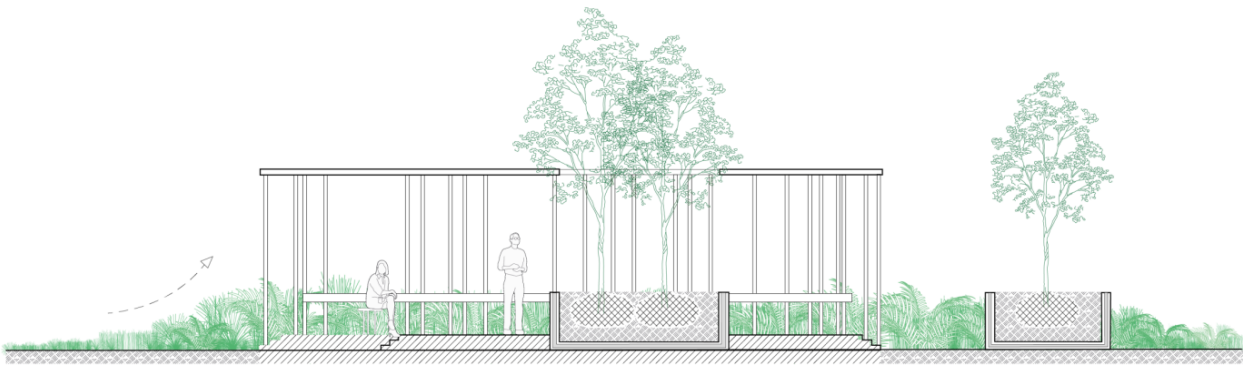

The concept of a new type of workspace is created on the principle of an ecosystem which is focused on human comfort. A friendly environment refers to the pristine nature that is embedded in a regular grid and tears it, thereby creating a healthy ecosystem for office workers.
